

The Tinnitus Research Initiative (TRI) is a privately-funded organisation dedicated to the development of effective treatments for all types of tinnitus so that relief can be obtained by everyone who suffers from it.

Participants of the 2<sup>nd</sup> TRI Meeting 2007 in Monaco

To promote collaborations and knowledge exchange, TRI organizes **regular scientific meetings**, including conferences and workshops. The first meeting took place in Regensburg in July 2006, the second meeting in the Principality of Monaco in July 2007, gathering people from all continents and from all disciplines.

# ANNOUNCEMENT

## 3<sup>rd</sup> Tinnitus Research Initiative Meeting

From Clinical Practice to  
Basic Neuroscience  
and back

An international conference on  
Tinnitus

June 24<sup>th</sup> - 26<sup>th</sup>, 2009, Stresa, Italy

## Dear Friends and Colleagues,

It is a great pleasure to invite you to join the third Tinnitus Research Initiative Meeting, taking place from June 24<sup>th</sup> to 26<sup>th</sup>, 2009.

Witnessing an exciting period in tinnitus research, advances in neurosciences offer us a deeper understanding of the mechanisms of tinnitus and enable fascinating new treatment possibilities. Following the spirit of the first TRI meetings we want to further encourage dialogue between basic scientists and clinicians. We are convinced that communication between researchers will facilitate both, a more profound understanding of the different forms of tinnitus and the development of more effective diagnostic and therapeutic measures.

We hope you will experience a lively exchange of scientific and clinical information and will enjoy Stresa as congress venue with its cozy atmosphere and its surrounding lake and mountains. The Scientific Program will cover all aspects of tinnitus research from basic science to clinical management.

Through symposia, poster sessions, educational workshops and meet the expert sessions, the meeting will bring together basic and clinical scientists from around the world.

We are looking forward to meet you at the 3rd TRI meeting in Stresa in 2009.

Berthold Langguth  
Chairman of the TRI Executive Committee

Luca Del Bo  
Member of the TRI Executive Committee  
Chairman of the Local Organising Committee

## Conference Program

Clinical Management of Tinnitus  
Basic Neuroscience  
Physiology & Anatomy  
Genetics, Pharmacology  
Sound therapy  
Auditory training  
Hearing aids  
Electrical stimulation of the cochlea  
Cortical and Brain stimulation  
Somatosensory Modulation  
Imaging, Neurofeedback  
Nutrition and Diet  
Diagnosis  
Tinnitus Subtyping, etc...

## Invited Speakers

Matteo de Nora (Principality of Monaco)  
Dirk de Ridder (Belgium)  
Luca Del Bo (Italy)  
Jos Eggermont (Canada)  
Ana Belen Elgoyhen (Argentina)  
Herta Flor (Germany)  
Ron Goodey (New Zealand)  
Pawel Jastreboff (USA)  
Berthold Langguth (Germany)  
Ed Lobarinas (USA)  
Alessandro Martini (Italy)  
Jennifer Melcher (USA)  
Aage Møller (USA)  
Arnaud Norena (France)  
Larry Roberts (Canada)  
Richard Salvi (USA)  
Tanit Sanchez (Brasil)  
Grant Searchfield (New Zealand)  
Richard Tyler (USA)  
Nathan Weisz (Germany)

## Poster Session and free talks

Submit an abstract for the opportunity to show your latest research to an international audience by presenting a poster or giving a talk.

Limited podium presentation  
Deadline: **January 31<sup>th</sup>, 2009**

## Congress Venue

Stresa is a small town of about 5,000 inhabitants on the shores of the Lago (Lake) Maggiore. Stresa is an international tourist resort since the second half of the nineteenth century and it is well known for its hotels and villas built in Liberty style and for their beautiful gardens.

Lago Maggiore (source: www.regina-palace.it)

## How to get there

by plane: Milan, Malpensa Airport or Linate Airport

by train: Line Milan-Geneva, stop Stresa

by car: E 62 - A 26 Exit Stresa

## Further Information

A pre-conference in Italian language will take place on June 23<sup>rd</sup>, 2009. Italian formation credits (ECM) will be provided.
